

NON RECORDABLE CRIME

The implementation of new recording processes has led to changes in the data that is held by the Constabulary. This means that we can now give statistics for non-recordable crimes which were not included within previous annual reports.

Annex C below contains a detailed breakdown of all non-recordable crimes that have been investigated from July 2019 onwards. Most of these crimes are miscellaneous road traffic offences, although the majority of road traffic offences do not require an investigation prior to prosecution.

ANNEX C: TABLE OF NON-RECORDABLE CRIMES

Note that the following tables in this annex count the offences investigated which do not require inclusion in recorded crime figures. These tables only count investigations recorded since Connect went live in June 2019.
